Instances (2)							
Filter instances							
Instance ID	Lifecycle	Instance type	Weighted capacity	Launch template/configuration	Availability Zone	Health status	Protected from
i-0d06d6ae17627492d5_u*	InService	t2.micro	-	launch-template-B00174492_u* Version 1	us-east-1a	Healthy	
i-0d06d6ae17627492d5_u*	Terminating	t2.micro	-	launch-template-B00174492_u* Version 1	us-east-1a	Healthy	

Instance lifecycle policy for lifecycle hooks
Controls instance behavior when an instance transitions through its lifecycle states.
Termination hook: abandon behavior
2025-09-09 18:05:05

Lifecycle hooks (0)					
Filter lifecycle hooks					
Name	Lifecycle transition	Default result	Heartbeat timeout (seconds)	Notification target ARN	Role ARN
No lifecycle hooks are currently configured. Lifecycle hooks help you perform custom actions on instances as they launch and before they terminate.					

Scaling

Info

You can resize your Auto Scaling group manually or automatically to meet changes in demand.

Scaling limits

Set limits on how much your desired capacity can be increased or decreased.

Min desired capacity

1

Equal or less than desired capacity

Max desired capacity

2

Equal or greater than desired capacity

Automatic scaling - optional

Choose whether to use a target tracking policy | Info

You can set up other metric-based scaling policies and scheduled scaling after creating your Auto Scaling group.

☐ No scaling policies

Your Auto Scaling group will remain at its initial size and will not dynamically resize to meet demand.

☒ Target tracking scaling policy

Choose a CloudWatch metric and target value and let the scaling policy adjust the desired capacity in proportion to the metric's value.

Scaling policy name

Target Tracking Policy

Metric type | Info

Monitored metric that determines if resource utilization is too low or high. If using EC2 metrics, consider enabling detailed monitoring for better scaling performance.

Average CPU utilization

Target value

60

Instance warmup | Info

500 seconds

☐ Disable scale in to create only a scale-out policy
